SUMMARY

Full-stack developer (React, TypeScript, C#.NET) who ships to production and operates it: accessible front-end features at Merzell, B2B e-commerce at Spinworks, AI developer tooling, and 2 live APIs on self-built infrastructure

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C#, Python, PHP, SQL, C, C++, Bash

Front end: React, Next.js, NX, Module Federation, HTML5, CSS3, WCAG 2.1 AA, ARIA

Back end: ASP.NET Core, Entity Framework Core, Node.js, Fastify, FastAPI, Symfony, OroCommerce

Data and DevOps: PostgreSQL, SQL Server, MySQL, Docker, GitHub Actions, Cloudflare, OpenTofu, Prometheus

AI and ML: LLM agents (Claude, Gemini, DeepSeek, Grok, Ollama), scikit-learn, TF-IDF, FastAPI model serving

Testing: Jest, React Testing Library, Vitest, MSTest, axe-core, mutation testing

EXPERIENCE

Software Engineer Intern, Merzell

Jun 2026 – Aug 2026

European public-procurement (e-tendering) SaaS platform

Copenhagen, Denmark

- Built the Document Library micro-frontend in React and TypeScript with routing, i18n, and Module Federation
- Designed an accessible file-uploader library (drag-and-drop, progress tracking) adopted by 3+ internal apps
- Resolved over 60% of accessibility violations in shared UI components, tested with React Testing Library

Freelance Web Developer

2026 – Present

Client websites for a small business and a non-profit

Remote

- Built and launched azclean.gr, a React and Vite site for an Athens cleaning business, plus its domain and DNS
- Developed a before-and-after photo slider from scratch for mouse, touch, and keyboard
- Rebuilt wayempowerment.com as a custom WordPress block theme with donating one click from every page

Junior Software Developer, Spinworks

Aug 2021 – Aug 2022

B2B e-commerce platforms for client storefronts

Athens, Greece

- Set up and optimized a Symfony and OroCommerce B2B platform for a client on a new Docker installation
- Built a Symfony storefront bundle (theming, layout and email templates) and updated Composer packages
- Rewrote slow database queries that delayed page loads on high-traffic storefronts

Web Developer (Volunteer), WAY Empowerment (Awe Center Kenya)

Jan 2021 – Feb 2024

- Designed and maintained a responsive WordPress site for an NGO supporting women and youth in Kenya

PROJECTS

Self-Hosted Production Platform | Docker, Cloudflare, OpenTofu, GitHub Actions, Prometheus

xgbuilds.dev

- Run 2 public APIs from a home server behind a Cloudflare Tunnel with no open ports, edge defined in OpenTofu
- Built a signed pipeline: CI scans each image, adds an SBOM, and signs it; the server verifies before deploy
- Automated 49 health checks, phone alerts, and encrypted nightly backups to local and offsite storage

TaskManager API | C#, ASP.NET Core, EF Core, PostgreSQL

tasks.xgbuilds.dev

- Built a live REST API with code-first migrations and key-protected writes, contract-tested on every push

ai-eng | JavaScript, mutation testing

github.com/XenofonGk/ai-eng

- Built a mutation-testing tool for AI-written code: on 59 real zod bugs, it flagged 27 (45.8%); existing tests caught 0

AgentMesh | TypeScript, Next.js, Fastify, Docker

github.com/XenofonGk/AgentMesh

- Built a self-hosted control plane for AI coding agents on 5 LLM providers, with API keys hidden from agents

Resume Classifier | Python, scikit-learn, FastAPI

resume-classifier.xgbuilds.dev

- Deployed an ML API that sorts resumes into 5 job families with confidence scores, trained without personal data

aoda-scan | Node.js, axe-core, Playwright

github.com/XenofonGk/aoda-scan

- Built an open-source CLI that crawls a whole site and grades it against WCAG 2.1 AA and Ontario AODA

EDUCATION

Seneca Polytechnic, Advanced Diploma, Computer Programming

2025 – 2027 (expected)

IEK Glyfadas, Technical Diploma, IT and Computer Science

2016 – 2018
