SUMMARY

Full-stack developer (React, TypeScript, C#/NET) who ships to production and operates it: accessible micro-frontends at Merzell, B2B e-commerce at Spinworks, AI developer tooling, and a self-hosted platform with signed CI/CD

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C#, Python, PHP, SQL, C, C++, Bash

Front end: React, Next.js, NX, Module Federation, micro-frontends, HTML5, CSS3, WCAG 2.1 AA, ARIA

Back end: ASP.NET Core, Entity Framework Core, Node.js, Fastify, FastAPI, Symfony, REST APIs

Cloud and DevOps: Docker, GitHub Actions (CI/CD), Cloudflare, OpenTofu (IaC), Prometheus, Grafana, Linux

Data: PostgreSQL, SQL Server, MySQL

AI and ML: LLM agents (Claude, Gemini, Ollama), scikit-learn, TF-IDF, mutation testing of AI-generated code

Testing: Jest, React Testing Library, Vitest, MSTest, axe-core, contract testing

EXPERIENCE

Software Engineer Intern, Merzell

Jun 2026 – Aug 2026

European public-procurement (e-tendering) SaaS platform

Copenhagen, Denmark

- Shipped the Document Library micro-frontend to production (React, TypeScript, i18n, Module Federation)
- Designed a reusable, accessible file-uploader library now used by 3+ product teams, including bid delivery
- Cut accessibility violations in shared UI components by over 60%, locked in with React Testing Library

Freelance Web Developer

Jan 2021 – Present

Websites for a small business and a non-profit, owned end to end

Remote

- Delivered azclean.gr for an Athens business from design to launch: React, Vite, domain, DNS, indexing
- Built a before-and-after photo slider from scratch that works by mouse, touch, and keyboard
- Built, maintained, and in 2026 rebuilt the WordPress site of WAY Empowerment, an NGO in Kenya

Junior Software Developer, Spinworks

Aug 2021 – Aug 2022

B2B e-commerce platforms for client storefronts

Athens, Greece

- Stood up and tuned a Symfony and OroCommerce B2B platform for a client on a new Docker environment
- Rewrote slow database queries behind high-traffic storefront pages, shortening page loads
- Built a Symfony storefront bundle (theme, layouts, email templates) and kept dependencies current

PROJECTS

Self-Hosted Production Platform | Docker, Cloudflare, OpenTofu, GitHub Actions, Prometheus xgbuilds.dev

- Operate 2 public APIs from a home server with zero open ports, the edge defined as code in OpenTofu
- Built a signed supply chain: CI tests, scans, and signs each image; the server verifies it before deploying
- Automated 49 health checks, phone alerting, and encrypted nightly backups offsite, with restores tested

ai-eng | JavaScript, mutation testing

github.com/XenofonGk/ai-eng

- Mutation-tests AI-written code: on 59 real zod bugs it flagged 27 (45.8%); the existing tests caught 0

AgentMesh | TypeScript, Next.js, Fastify, Docker

github.com/XenofonGk/AgentMesh

- Architected a 14k-line TypeScript control plane for AI agents on 5 LLM providers, keys hidden from agents

Resume Classifier | Python, scikit-learn, FastAPI

resume-classifier.xgbuilds.dev

- Diagnosed a perfect 1.00 score as dataset leakage and rebuilt the corpus until the score meant something

TaskManager API | C#, ASP.NET Core, EF Core, PostgreSQL

tasks.xgbuilds.dev

- Deployed a live REST API with constant-time key checks and contract tests against real PostgreSQL in CI

aoda-scan | Node.js, axe-core, Playwright

github.com/XenofonGk/aoda-scan

- Built an open-source CLI that grades whole sites against WCAG 2.1 AA and AODA, grouping repeated faults

EDUCATION

Seneca Polytechnic, Advanced Diploma, Computer Programming

2025 – 2027 (expected)

IEK Glyfadas, Technical Diploma, IT and Computer Science

2016 – 2018
